# Kestrel 5000

### Portable environmental meter.

The Kestrel 5000 is a portable environmental meter that measures multiple airflow and weather conditions. The Kestrel 5000 can hold up to 10,000 data points and create graphs of the data to view the environmental changes over time. Data can then be uploaded to a PC or Mac. The Kestrel 5000 gives you current environmental conditions in the palm of your hand.

#### **KESTREL 5000 SPECIFICATIONS**

## **Environmental Measurements**

#### **Exterior Sensors**

Wind speed/Air speed Ambient temperature Relative humidity Barometric pressure Absolute pressure

#### **Calculated Readings**

Wind chill
Heat stress Index
Dew point temperature
Wet bulb temperature
Altitude (Barometric)
Density altitude

#### **Additional Readings**

Compass direction

#### **Physical**

#### **Enclosure**

Waterproof IP67 and NEMA-6 Flip-top impeller cover

#### **Operating Temperature**

-10°C to 55°C

#### **Display**

High resolution Backlit screen

#### **Dimensions**

12.7 x 4.5 x 2.8cm

#### Power

Lithium AA battery Up to 400 hours of use

#### Weight

121 g (4.3 oz)

**≯** +1.705.682.0814
